

HSBC sustainability

[Narrator] We should be grateful for what we have.

We should be grateful for what get.

Nature always gives us the energy of life, inspiration, and hope.

But sometimes people forget and took too much.

A lot of things have happened recently, trying to remind us.

Together we can build a new mindset and a long-term relationship with nature, and an environmentally conscious economy, maintaining the natural resources availability.

At HSBC, we recognise the importance of running a business sustainably, for ourselves, our customers, and the community.

We appreciate those who think ahead, integrating the environment, social and governance into their decision making.

Because from one good thing, it will trigger other good things.

It's not just for us, but a promise to our children.

Because in their hands, a strong global economy will prevail.

This is the commitment of HSBC.

This is what enables us to grow sustainably and commercially viable.

All of us always have a choice.

Starting from ourselves.

Choose to move and contribute for a healthy environment and a sustainable economy.
